

Grazie Shoes Wholesale

Grazie Footwear Life-Style

Grazie Footwear launched in October 2009 after realizing the strong demand for embellished footwear. The family owned label strives to deliver Life-Style Footwear with jeweled EVA's, embellishments, as well as current market materials and colors.

This kind of footwear has drawn a loyal and steady following. We want to continue to service our fashion minded customers with a product not only understood, but desired. The Grazie customer is a fashion-minded, impulsive, accessory driven woman, also greatly valuing and "needing" comfort as they are women on-the-go. These are street shoes meant to be worn for casual work environments and play. Our embellished footwear is likely to be seen as Jewelry for your Feet and what girl doesn't love jewelry!

About our Shoes

How do you determine the wedge height?

We measure the wedge height from the highest point on the heel of the shoe. If you have any questions that cannot be answered for you online, please feel free to call us at 1-888-374-3368 or e-mail us at info@graziefootwear.com.

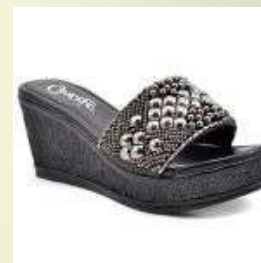

Do your shoes run true to size?

While every foot is different, the majority of our styles run true to size. On each items page, if it does not usually run true to size, a note is posted regarding the fit. Again, as every foot is different, these are just suggestions based on the average person. Even though our suggestion is most often accurate, please base your decision on your prior personal experience regarding fit.

What is your shoe policy?

If you purchased shoes from our website and they have become defective in any way and are within 6 months of purchase, we will be happy to replace them. Any shoes worn for more than 6 months will have to be purchased but we will offer a discount. Please call 888-374-3368 or email us at info@volatileusa.com.
